

BEING EXPLICITLY PROGRAMMED!!

Providing specific instructions for every task or decision that a computer needs to make.

- Players roll a dice to decide the first move.
- Move your checker diagonally to an empty adjacent space.
Only your own checker pieces are eligible for moving & Move precisely one space diagonally.
- Jump over your opponent's checker, landing in an empty space just behind it.
After jumping over your opponent's checker, their piece is removed from the board.
- Check for more jumping opportunities to continue your turn, allowing consecutive jumps.
- After your turn, your opponent takes their turn following the same rules.
- Players alternate turns.
- After the first game, the winner of the previous game typically goes first in subsequent games.
