CLASSES
STRUCTURE

The course lectures (excluding lecture 12th) will follow this structure:

Dataathon Presentations

- 2-minute presentations
- Discussion and brainstorming
- 7 randomly selected teams

in-classroom

- Low-fidelity prototype
- Quercus submission

Lecture

- Overview of the core concepts
- Introduction of the ML techniques

Implementations (fully/partially)

- Workflow and code
- Methodological examples
- Technical descriptions

Datathons and Prototyping

- Random group assignments
- Dataset release and problem definition

Final Submission

- Codes
- Presentation
- Report (s)

Datathon #n-1

Submission = 2pm

Dataathon #n

Submission = 8pm

EVALUATION*

- ▶ **Datathons [55%]**—Includes weekly assignments and the main project.
- ▶ **ML pipeline implementation for the course project [30%]**—Presentation due December 5th.
- ▶ **Project's Research Paper [15%]**
- ▶ **Bonus [5%]**—Awarded for aiding peers' learning.

*Team members contributions will be evaluated individually
